

Proposed Attendance Area Revisions 2023-24 School Year

Clairemont Cluster:
Holmes Elementary
Marston Middle
Clairemont High

Madison Cluster:
Clairemont Canyons Academy
Innovation Middle
Madison High

What?

The district is proposing revisions to the attendance areas of Clairemont Canyons Academy and Holmes Elementary, Innovation and Marston Middle, and Clairemont and Madison High for the 2023-24 school year.

A portion of the Holmes attendance area would become part of the Clairemont Canyons Academy attendance area. District policy is to revise boundaries at all levels to maintain feeder pattern continuity. As a result, the same portion of Marston Middle and Clairemont High attendance areas would become part of Innovation Middle and Madison High areas.

Why?

Revisions are proposed because residential development is expected to generate elementary enrollment exceeding Holmes' facility capacity. Facility space will be needed for approximately 85 to 170 elementary age students. New housing at Genesee Avenue and Balboa Avenue will be occupied during the 2023-24 school year.

To ensure space for future students, a portion of the Holmes attendance area that includes new housing would become part of the Clairemont Canyons Academy attendance area, where new facilities have adequate capacity for additional enrollment.

Who?

No residents currently live in the area proposed for change; there are only businesses.

Therefore, no current students at any schools are affected by the proposed revisions. Only future students use the new attendance area maps.
